

Information Request JS-NSTAR-1-8

Please provide copies of (1) all prefiled testimony or reports (including all associated exhibits and attachments) submitted by Ms. Pamlesano to state and federal regulatory authorities and legislative bodies from 1999 to the present; and (2) transcripts of Ms. Parmesano's testimony at hearings (adjudicatory or non-adjudicatory) before state and federal regulatory authorities from 1999 to the present.

Response

As indicated in Exhibit NSTAR-HSP-2, pp. 7-8, Dr. Parmesano has filed testimony in 4 dockets from 1999 to the present. Only the first case (NYPSC Case No. 02-E-0198) is in any way related to the issues in this case. Copies of the testimony and exhibits were provided in response to Information Request AG-2-5. No transcript is available.

Information Request JS-NSTAR-1-9

Provide copies of all regulatory decisions addressing the issues covered by Ms. Parmesano in testimony provided in response to Information Request JS-NSTAR-1-8. Identify the decision making authority, docket number, year of the decision, and any official citation to the decision.

Response

The web address where commission decisions regarding this case are posted was provided in response to Information Request AG-2-5.

Information Request JS-NSTAR-1-10

At P. 16 Mr. LaMontagne testifies that many DG customers may elect to sell their fuel simultaneously at attractive market prices.

- A. Provide all available information regarding the relationship of fuel costs experienced by DG systems to the fuel costs experienced by the providers of wholesale energy that is delivered by NSTAR.
- B. Provide all available documents on other information regarding the current fuel diversity of DG and how this diversity is expected to change, shown as a percentage of DG users who currently use the same fuel sources.
- C. Provide all available information regarding the percentages of DG users using the same fuel who also purchase such fuel under the same or similar contracting arrangements.

Response

Information regarding the fuel source for existing QF installations is provided in the responses to Information Requests DTE-2-1 and DOER-1-1. In addition, the Company is cognizant of reports in the media and industry publications regarding investigations underway to determine the extent of electric gas-fired generation foregone in-lieu of sales of the gas fuel into the gas market during the extreme cold periods experienced this winter.
